

Whitman County Economic Development Fund

Please read this document and the “Whitman County Economic Development Public Facilities Project Proposal” thoroughly before completing the “Proposal”

Guiding Principles

Goal: To promote economic development defined by the creating and/or retention of living wage jobs that will increase the vitality of the local economy.

Principle 1 (Proposal Form - Topic 3)

Invest in projects that retain or increase sustainable economic capacity.

- This funding can be used to develop public facilities that are directly needed for a specific economic development project. Public facilities include publicly owned or leased facilities such as business parks or buildings rented to businesses, or publicly owned utilities, telecommunications or roads needed to retain or expand existing businesses or accommodate new businesses or similar facilities.
- This funding will be used primarily for projects that have a potential for directly accommodating or supporting the retention of existing employment or development of new employment.

Principle 2 (Proposal Form - Topic 4)

Invest in projects in partnership with the local communities and others.

- The applicant or other local sponsor must invest in the project by providing 10% or more of the project costs. The local investment can be provided in the form of volunteer work or donated land, materials, supplies or services or by investing cash in the project.
- The County’s economic development fund will preferably cover no more than 50% of the total project costs but may not be used to cover more than 75% of the project costs.
- The County’s economic development fund is intended to provide only the funding needed to make a project feasible. For example, some financing sources will not cover more than 70% of the project costs therefore if the applicant is only able to provide local funds for 20% of the projected costs a grant equal to 10% of the project costs is needed to make the example project feasible.

Principle 3 (Proposal Form - Topic 5)

Invest in projects that are well planned and ready to be implemented.

- The project must be the implementation of a project or strategy included in a publicly adopted plan. Acceptable plans are the officially adopted county economic development plan, economic development section of the county’s comprehensive plan, the county’s capital facilities plan, a city or town’s comprehensive plan or a city or towns capital facilities plan.

Principle 4 (Proposal Form - Topic 6)

Invest in projects that build on the sustainable conditions, resources, people and communities in Whitman County.

Eligible Applicants Include:

- Cities & towns,
- County & Port,
- Other taxing districts within Whitman County such as the Libraries, Hospital districts, etc.
- Public corporations organized under RCW 35.21.730 – 759 (example: Uniontown Community Development Association, Garfield Public Development Authority)
- Only one grant for public utilities will be allowed an entity every 5 years.

Eligible Projects include construction, renovation or expansion of facilities owned or leased by an eligible applicant that facilitate, enable or promote the creation or retention of jobs. This could include a building, a business park, utility infrastructure, transportation infrastructure, telecommunication infrastructure, or other commercial infrastructure. **Funds will not be issued to cover costs that were incurred prior to the application date. Projects must be listed in the county’s comprehensive plan, a city or town’s comprehensive plan, in the county’s or a city or town’s capital facilities plan, or in an officially adopted county overall economic development plan and the plan attached to the application.**

Project Selection Process

1. The County Commissioners will issue a request for proposals in **January**.
2. Technical assistance in developing proposals will be provided to potential applicants by the BRATC Chairman or Commissioners’ Clerk of the Board.
3. Project proposals are due by (specific date determined annually).
4. Proposals will be reviewed and evaluated by BRATC to determine project validity.
5. All applicants with viable projects will be asked to make an oral presentation at the annual BRATC meeting held in April.
6. BRATC will forward their recommendation to the County Commissioners immediately following their annual evaluation meeting.
7. The Commissioners will act on BRATC’s recommendation.

Specific issues when addressed in a detailed manner will enhance the ranking of the project. Not all issues will apply to any given project. The issues are most relevant to the topic (line) numbers of the application form listed in the right hand column.

	Topic
