30	29	28	27	26	25
31	32	33	34	35	36

The Range and Township System was originally used to survey undeveloped lands. Land is divided into townships approximately six miles by six miles square, labelled by township numbers running north and south, and by range numbers running east and west. Townships are further divided into 36 numbered sections, each approximately one square mile. The diagram above shows a township with all sections labelled.
